引文與參考書目

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation.

Acupuncture or acupressure at the Neiguan (PC6) point, located on the pericardium meridian, has been shown to be effective in the treatment of nausea and vomiting (Bai and Baron, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Lencastre *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). The mechanism is related to autonomic nervous activity (Morro and Hall, 1996). It is speculated that the autonomic nervous activity modulation at the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with depressed vagal modulation, and the restoration of vagal modulation is associated with the improvement

[PDF] Species contributions to **PM2.5** mass concentrations: Revisiting common assumptions for estimating organic mass

BJ Turpin, HJ Lim - Aerosol Science & Technology, 2001 - Taylor & Francis

In virtually all published literature wherein closure between gravimetric and chemical measurements is tested, the concentration of particulate matter is compared to the measured concentration of organic carbon (micrograms per cubic meter).

被引用 1401 次 相關文章 全部共 5 個版本 **引用** 儲存

The seven deadly sins of DNA barcoding

By: Collins, RA (Collins, R. A.)^[1]; Cruickshank, RH (Cruickshank, R. H.)^[2]

MOLECULAR ECOLOGY RESOURCES
Volume: 13 Issue: 6 Pages: 969-975 Special Issue: SI
DOI: 10.1111/1755-0998.12046
Published: NOV 2013
Document Type: Editorial Material
[View Journal Impact](#)

Abstract

Despite the broad benefits that DNA barcoding can bring to a diverse range of biological disciplines, a number of shortcomings still exist in terms of the experimental design of studies incorporating this approach. One underlying reason for this lies in the confusion that often exists between species discovery and specimen identification, and this is reflected in the way that hypotheses are generated and tested. Although these aims can be associated, they are quite distinct and require different methodological approaches, but their conflation has led to the frequently inappropriate use of commonly used analytical methods such as neighbour-joining trees, bootstrap resampling and fixed distance thresholds. Furthermore, the misidentification of voucher specimens can also have serious implications for end users of reference libraries such as the Barcode of Life Data Systems, and in this regard we advocate increased diligence in the a priori identification of specimens to be used for this purpose. This commentary provides an assessment of seven deficiencies that we identify as common in the DNA barcoding literature, and outline some potential improvements for its adaptation and adoption towards more reliable and accurate outcomes.

(@sris.com.tw) would like to share an EndNote library with you.

To accept this invitation and access library, you must have EndNote X7.2 or later installed, and we strongly recommend using EndNote X9 for the best experience.

Once you've accepted this invitation, you will be able to access all of the references, PDFs, file attachments, and notes in this shared library from your EndNote desktop application.

Accept: <https://account.endnote.com/enwservices/invitation/#/fd34bca1-7f58-4982-babd-3d7e35c796bb>

Don't have EndNote for your desktop yet? Get X9 now to access shared libraries and much more. http://endnote.com/buy?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=buy-en

Learn more about sharing your research with EndNote. http://endnote.com/?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=learn-more

If you do not wish to accept this invitation, please notify directly.
